## Lab Test Report

A Comprehensive BLI Laboratory Evaluation

### RISO RZ390UI 60 to 130 CPM Digital Duplicator

### PERFORMANCE RATINGS

Click rating for details. Click ▲ and ▼ to move through document.

Reliability .....	Excellent
Copy Quality .....	Good
Ease of Use .....	Good
Feature Set .....	Good
Ink Yield .....	Good
Value .....	Excellent

**Test duration:** Two months, including a 500,000-impression durability test.

Rating Scale: Excellent, Very Good, Good, Fair, Poor

Manufacturer's maximum recommended monthly volume: 500,000 impressions.  
 BLI's recommended monthly volume for optimum performance: Up to 400,000 impressions.  
**More information on the RISO RZ390UI is available through bliQ ([www.buyerslab.com/bliQ](http://www.buyerslab.com/bliQ)).**

### BLI RECOMMENDATION

The RISO RZ390UI digital duplicator, offering strong reliability and good overall output quality for a low price, gave a commendable performance in BLI's rigorous laboratory evaluation. While, like copiers, digital duplicators are used to make copies, unlike copiers, they do so by first creating an imaged thermal intermediate master of the scanned original and then producing the desired number of copies using liquid ink. Capable of supporting high speeds and high volumes at much lower cost than would be possible for a copier, digital duplicators are extremely economical compared to copiers when reproducing many copies from each original, and thus are very well suited for this type of application. To help maximize the unit's economy, an administrator can set the minimum print quantity allowed from a single master by the unit (default is zero; can be set from zero to 50, in increments of ten) to deter an operator from making too few copies from the master. Conversely, they are not well-suited to producing sets of multiple-page originals in smaller quantities. Although they require somewhat more operator attention, they also tend to be highly reliable. The reliability and economy that are hallmarks of digital duplicator technology were both demonstrated in BLI's test of RISO's RZ390UI.

The unit, which supports 11" x 17" imaging and printing, also proved to be easy to use. In addition to demonstrating good overall performance, the RZ390UI offers a competitive feature set that includes a speed of 60 to 130 ppm. Most digital duplicators offer a top speed of 120 ppm. Also noteworthy is the unit's master time (18.4 seconds), which is the second-fastest for digital duplicators tested to date. Combined with its good overall performance, the RZ390UI's aggressive pricing and low per-page supplies costs make it an excellent value. BLI highly recommends the RZ390UI as a reliable and economical choice for offices in need of a digital duplicator for monthly volumes of up to 400,000 impressions.

LAB TEST

## Performance Overview

### Reliability

**EXCELLENT**

- + Impressively, the test unit demonstrated flawless reliability, logging 500,000 impressions in its durability test without any service calls or even a misfeed occurring.
- + Further contributing to high uptime for this model is a PM interval that, at 500,000 impressions, is higher than that of most digital duplicators.

### Copy Quality

**GOOD**

- + When compared with other digital duplicators tested, output of the RISO RZ390UI was rated “Good” in most categories (text, solids and halftone range).
- + The RISO RZ390UI produced the highest copy density rating for digital duplicators tested to date.
- Halftone output was clearly visible from the 15% dot-fill level, which is the minimum coverage level on the original, to the 100% dot-fill, level, but fill was grainy.
- Line art output displayed inconsistent line thickness.
- Copy quality is rated at the unit’s default speed. Different speeds may affect image quality.
- It should be noted that, since digital duplicators use ink to produce documents, unlike laser printers, copiers and MFPs, which use toner, the pages must be handled carefully (for example, the copies produced on a digital duplicator are subject to smudging before the ink dries, and to image bleed onto the other side of low-weight paper). Documents requiring the highest image quality may not be best suited to a digital duplicator.

### Ease of Use

**GOOD**

- + The control panel, which spans the length of the unit and allows for simple selection of both routine and advanced functions, is well laid out.
- The “main” panel consists of hard keys for functions including mode selection (i.e. master making and printing), quantity selection, proof print and adjust-

*+ , - and ○ represent positive, negative and neutral attributes, respectively.*

**Riso RZ390 Control Panel**

ments to speed, print density and print position. It also features a graphical representation of the unit with numbered areas to indicate where problems could occur.

- The “sub” panel, which is inset on the left portion of the control panel, features soft keys for functions including reduction/enlargement, image type (i.e., line, photo, text/photo or pencil), ink-save mode and confidential mode.
- + The RISO RZ390UI earned good marks for its ease of loading paper, adjusting the paper feed table and removing misfeeds.
- + Replacing ink was a simple and clean procedure. The user opens the front panel, turns the ink cartridge to unlock it. The user then simply removes the old cartridge and replaces it with a new one and repeats the steps in reverse order. The inner front cover includes illustrations covering the procedures for installation and removal of supplies.
- + Similarly, replacing masters was a simple and clean procedure. The user opens the front panel of the unit, presses the master roll release button, pulls out the assembly, removes the master roll and places a new roll in the unit. The beginning master is then placed underneath the master guide and the cover is then closed. The inside section of the duplicator includes illustrations on installation and removal of supplies.
- + Emptying the master disposal box was also found to be a simple and clean procedure. The user grasps the lever on the waste container, pushes downward on the lever and pulls out the container. The user then empties the container and places it back in the duplicator.
- Unlike many other duplicators, which offer a text display for error messages, the RZ390UI offers only a four-character error code display, and the user will need to keep the User’s Guide handy to interpret the codes.

## Feature Set

GOOD

- The RZ390UI offers the features that would be expected of a digital duplicator, including a flatbed scanner; standard non-upgradable paper capacity of 1,000 sheets; the ability to accommodate up to 110-lb. index; and zoom reduction/enlargement from 50 to 200 percent (as well as preset magnification modes).
- + The speed of the RZ390UI is adjustable from 60 to 130 ppm, while most digital duplicators offer a top speed of 120 ppm.
- + Total counters are offered for the number of copies and number of masters.
- Unlike many other duplicators, the unit does not offer copy control codes, which allow administrators to track usage by individual operators.
- An optional Key Card Counter enables administrators to limit duplicator access to card holders and to set minimum and maximum usage per user. In addition, the unit can track the number of copies produced and number of masters consumed within a given period of time.
- Other features include a proof copy mode that enables users to check and adjust image quality as needed; vertical and horizontal print position adjustments; and confidential print (whereby the master created of an original will automatically be discarded to prevent unauthorized use).
- This unit also features RISO's i Quality System, through which the duplicator and i Quality-equipped supplies (i.e., ink bottles and master rolls) communicate real-time data, including shortages of remaining supplies, to help optimize performance.
- Options for this device, while not configured on the test unit, include a variety of color ink drums that can be inserted by the user into the unit's drum assembly (separate drums are required for each color), allowing copies in a choice of up to 70 colors (one color at a time); a network interface card, which connects the unit to the network and comes bundled with RISO-MONITOR remote printer-monitoring software; a printer control board, which directly connects the duplicator to a computer; and the capability to link a printer to the duplicator (either directly, via a crossover cable, or over the network) and software that enables smaller-quantity jobs to automatically be sent to the printer rather than the duplicator for more economical printing.

*Ink Yield***GOOD**

- Though ink yield was below average when tested at lower volumes (i.e., 25 impressions and 500 impressions), it was competitive at 1,000 impressions and at 5,000 impressions. Since duplicators are designed for long runs, ink yield was judged to be good overall.

*Value***EXCELLENT**

- + The RZ390UI is priced better than the average for digital duplicators, even with pricing for print and network options included. Indeed, it's more than \$4,000 less than the average. Only two models, also RISO models (the RZ220UI and the RZ310UI), have lower prices. Moreover, the unit's estimated cost per page for ink and estimated cost per page for supplies are excellent when compared to the average. The RZ390UI's good overall performance in the tests, combined with its competitive feature set and low acquisition and supplies costs, make it an excellent value.

## Supporting Test Data

### Test Environment

This product was tested in BLI's 10,000-square-foot test lab, in an environment monitored by a Honeywell Temp/RH chart recorder, which replicates typical office conditions.

### Test Equipment

This product was tested as a stand-alone device. Network-enabled devices are tested on BLI's dedicated test network, consisting of Windows NT 4.0, 2000 and Microsoft Exchange servers, Windows 98 and 2000 workstations, 10BaseT/100BaseTX network switches and CAT5 cabling.

### Test Duration

Products are tested for two months, one month of which consists of a durability test during which the product is run at its manufacturer-rated maximum monthly volume, with daily volumes evenly divided over the course of the test.

### Tested Configuration

Base unit.

### Test Procedures

The test methods and procedures employed by BLI in its lab testing include BLI's proprietary procedures and industry-standard test procedures. In addition to a number of proprietary test documents, BLI uses an industry-standard Katun test original for evaluating black image quality.

Reliability

PMs/Malfunctions	Service Required	Meter Count (Impressions)	Impressions Between Service
Meter count (beginning of test)		0	
End of test period		500,000	
Total misfeeds/misfeed rate	0 / Not applicable		
Service calls	0		
PMs	0		
Total service calls (including PMs)	0		
M.I.B.F. <sup>1</sup>	Not applicable		
M.I.B.S. <sup>2</sup>	Not applicable		

<sup>1</sup> Mean Impressions Between Failures (To obtain this number, BLI divides the total number of impressions produced during the test period by the number of service calls required. In actuality, it reflects the average number of impressions produced without a malfunction.)

<sup>2</sup> Mean Impressions Between Service (To obtain this number, BLI divides the total number of impressions produced during the test period by the number of service calls, including preventive maintenance calls, required. In actuality, it reflects the average number of impressions produced without a service call.)

### Copy Quality

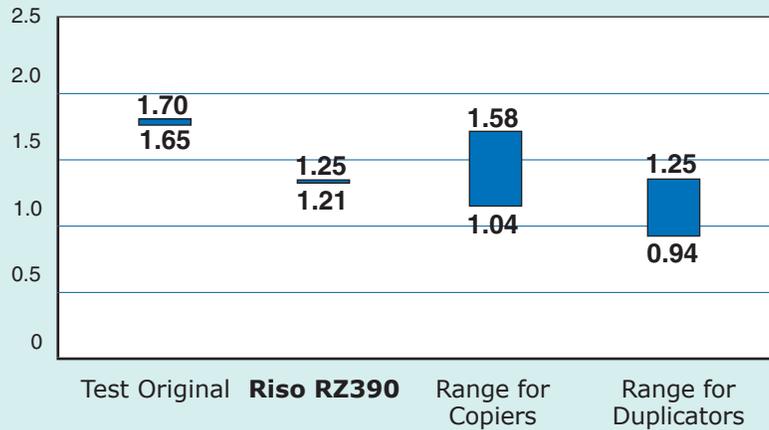

Density of original:  
1.65 to 1.70.

Density for duplicators tested to date:  
0.94 to 1.25.

Density of copy:  
1.21 to 1.25.

Density for copiers tested to date:  
1.04 to 1.58.

#### COPY DENSITY

Measurements are based on eight readings corresponding to eight different solid black locations on the original. The higher the density reading, the darker the image.

### Productivity

**First-copy time:**

18.4 seconds (master time from the platen , 8-1/2" x 11" copies).

**Copies per minute:**

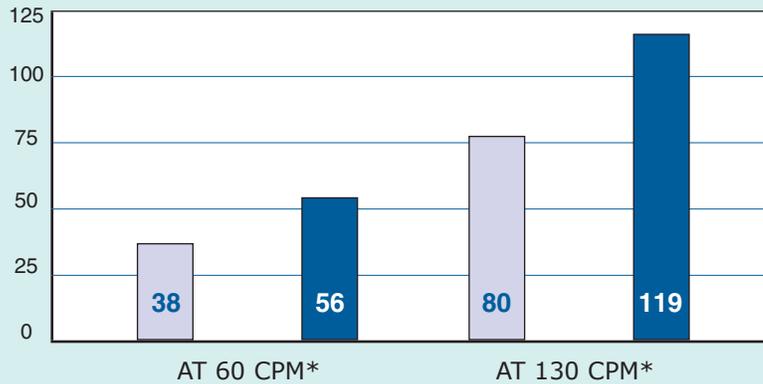

**At 60 cpm:**

38, including first copy with master.  
56, including first copy without master.

**At 130 cpm:**

80, including first copy with master.  
119, including first copy without master.

**COPIES PER MINUTE**

- Including first copy with master
- Including first copy without master

\*There are five print-speed settings: 60, 80, 100, 120 and 130 cpm.

Ink Yield

TESTED INK YIELD / SUPPLIES COST PER PAGE

Impressions Per Master	Net Weight of Ink	Ink Yield (Impressions) <sup>1</sup>	Impressions Per Gram	Ink Cost Per Page	Supplies Cost Per Page <sup>1</sup>
25 impressions	906.2 grams	4,657	5.14	0.539¢	1.786¢
50 impressions	906.2 grams	8,350	9.21	0.347¢	0.970¢
100 impressions	907.8 grams	13,852	15.26	0.209¢	0.521¢
500 impressions	894.1 grams	29,404	32.89	0.098¢	0.160¢
1,000 impressions	901.2 grams	33,933	37.65	0.085¢	0.116¢
5,000 impressions	914.5 grams	39,462	43.15	0.073¢	0.079¢

<sup>1</sup> The supplies cost per page is based on estimated retail pricing, BLI's tested ink yields at six volumes (based on BLI's ink yield test original with 6% coverage) and the manufacturer's rated yield for the master roll using a ledger-size drum and 8-1/2" x 11" paper.

Ability to manually duplex

Good. However, as with all digital ink duplicators, users must be sure to allow the ink on the copies to dry for several minutes and they must jog and fan the copies before reinserting them into the machine for duplexing. If this is not done, copies may stick together and set-off and/or jamming may occur.

### Specifications

#### BACKGROUND INFO

Dataquest Segment NA	
SRP (USA; Canada):	\$9,995; \$13,495
Manufacturing Status:	New
Domestic Intro Date:	October 2004
OEM:	RISO, Inc. (China)
Also Sold As:	None

Distribution:	Dealers and branches
Mfr's Rec Mo Vol:	Up to 500,000+ copies

#### TYPE

Digital duplicator	
Configuration/Scanner:	Console, digital
Toner:	Ink technology

#### GENERAL SPECIFICATIONS/PAPER HANDLING

First-Copy Time:	16 sec
Multicopy (Ltr/Lg/Ldgr):	60 to 130/60 to 130 cpm/Info not avail
Warm-Up Time:	None
Std Paper Source(s):	Single tray
Std Paper Capacity:	1,000 sheets
Paper Weights:	13-lb bond to 110-lb index
Bypass/Paper Weights:	None
Max Paper Sources/Capacity:	1/1,000 sheets
Max Original Size:	11 x 17
Min/Max Output Size:	3-1/2 x 5/11 x 17
Scan/Copy Resolution:	300 x 600/emulated 600 dpi
Std/Max Copier Memory:	Not applicable
Duplex:	Manual
Capacity/Paper Sizes:	Not applicable
Document Feeder:	Opt ADF
Speed/Capacity:	Info not avail/50 orig
Paper Weights:	15 to 28 lbs
Sorter (Bins/Capacity):	None
Stapler Sorter:	None
Bins/Stapling Capacity:	Not applicable
Stapling Positions:	Not applicable
Finisher:	None
Tray/Stapling/Position(s):	Not applicable
Other: Copies on NCR, envelopes, post cards and card stock; precision stacking tray; 5 adjustable copy speeds (60, 80, 100, 120, 130)	

#### CONTROL PANEL

LED keypad w/indicators	
Quantity Selector:	1 to 9,999 (0 to 9 keypad)
Message Display:	Yes
Help Key:	No

#### OPTIONS

ADF: \$1,550  
 Separator: \$385  
 Key counter: \$1,050  
 Print (color) cylinder: \$1,295  
 TC5100 off-line collator: \$6,295  
 Paper feed kit: \$175
